LANGUAGES

Portuguese: Native
English: Bilingual
German: Intermediate

TECHNICAL SKILLS

- **Languages:**
Java, Python, Kotlin, PHP, JavaScript
- **Web & Frameworks:**
HTML5, CSS3, XAMPP, Node.js
- **Databases:**
MySQL, Supabase, PostgreSQL, SQL Server (SSMS), MongoDB
- **Developer Tools:**
Git, GitHub, Docker, Android Studio, IntelliJ IDEA, VS Code
- **Extra Tools:**
Canva, Photoscape, Office

SOFT SKILLS

- Communication
- Teamwork
- Problem-solving
- Time management
- Adaptability

PROFILE SUMMARY

Computer Science student skilled in application development, web development, and database management, capable of delivering practical software solutions optimized for performance while continually advancing expertise in software engineering.

Education

NUST, Windhoek | 2024 – Present (Expected Graduation: 2027)
3rd Year Bachelor of Computer Science (Software Development)

Projects

Github profile: [anselmo-martins \(Anselmo Martins\)](#)

Jobseeking Application

Java & SQL | Developed Swing desktop application with MySQL integration that connects job seekers and employers, enabling job searching, applications, and postings while demonstrating OOP principles through a multi-tiered architecture with centralized database management.

Property Evaluation System

Java & SQL | Developed a Swing desktop application that uses custom algorithms and local market data to automate real estate valuations in Windhoek.

Valentine's Repair Shop Mobile Application

Kotlin & Supabase | Developed an Android vehicle management application using Jetpack Compose that digitizes truck intake and collaborative repair workflows for mechanics and administrators, featuring role-based dashboards, task tracking, fleet analytics, and real-time data synchronization.

Clinic Queue System

JavaScript, HTML, CSS, PHP, XAMPP + SQL | Developed a Queue System that digitizes healthcare clinic operations in Namibia with real-time queue management, staff authentication, patient registration, and quick statistics tracking through a responsive web interface.

Smart Public Transport Ticketing System

Ballerina, PowerShell, Docker, MongoDB, Kafka | Developed a Smart Public Transport Ticketing System that implements a distributed microservices architecture for buses and trains in Windhoek, featuring event-driven ticket purchases, payment processing, real-time notifications, and comprehensive admin analytics with Docker containerization and Docker Compose orchestration.

Tic-Tac-Toe Game

Python | unbeatable Tic-Tac-Toe AI game using Minimax adversarial search algorithm with logical decision making

Interests

- Music / Instruments
- Explore new places
- Coding
- Cooking
- Games & Chess
- Sports
- Tech-related items/ expo
- Artificial Intelligence

Certifications / Training

Kotlin Mobile Development

| April 2026: Complete

TheOdinProject

| 2025 – present: In progress

ADDITIONAL INFORMATION

- Learner's License
